

Week 3. CSS Week - Todo List

Step 1: Learning the theory part (Watch the lecture videos and read the notes)

Basics of CSS - Part I

1.1 : Introduction to CSS

- Watch the video
- Read the corresponding note section

1.2 : Understanding CSS versions

- Watch the video
- Read the corresponding note section

1.3 : Adding CSS instructions to HTML Documents

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - Create a folder called “cssPractice”, in your “Evangadi > Phase- 1 > Week-3” folder. Inside the “cssPractice” folder, create a folder and a file called “CSS” and “index.html”, respectively. In addition, create a file named “style.css” inside the “CSS” folder.
 - In VScode, open the previously created "index.html" file and generate an HTML boilerplate.
 - Practice the three methods of adding instructions to HTML documents, as you watch the videos.

1.4 : CSS Units

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - Practice the most commonly used CSS units, in the “index.html” file you created earlier.

1.5 : Thinking in terms of containers

- Watch the video
- Read the corresponding note section, (including the step-by-step instruction on how to build puppy-lover's-page-design, in terms of container)
- Hands-on Computer:
 - While watching the video, construct the HTML structure of the "puppy-lover's-page" in terms of container.

1.6 : Naming containers and elements using Id and classes

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - While watching the video, practice assigning a class or Id name to the HTML structure of the “puppy-lover's-page” you created earlier by using the “thinking in terms of containers” approach.

Note:

Make sure the id and/or class name of your HTML files are more descriptive and/or related to your HTML element.

1.7 : Selecting elements using id, class, and element type.

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - While watching the video, practice selecting HTML elements with Id, class, or element type selectors.

1.8 : Selecting elements using star (wild selector), hover, and descendant selectors

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - While watching the video, practice selecting HTML elements with star/wild/universal, hover, or descendant selectors.

Basics of CSS - Part II

2.1 : Introduction to CSS properties

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - While watching the video, practice organizing your file and folder structure of “puppy-lover’s-page-design”.
 - Insert the appropriate image into each HTML element section.

2.2 : Introduction to most common CSS properties

- Watch the video
- Read the corresponding note section (summarize the most common CSS properties)

2.3 : Display property

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - Along with watching the video, practice the most commonly used “display” CSS property values.

2.4 : Position property

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - Along with watching the video, practice the most commonly used “position” CSS property values.

2.5 : Width and height

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - Along with watching the video, practice the most commonly used “width and height” CSS property values.

2.6 : Margin and padding

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - Along with watching the video, practice the most commonly used “margin and padding” CSS property values.

2.7 : Applying margin and padding properties to Puppy Lover’s pageproject

- Watch the video
- Hands-on Computer:
 - Along with the video, practice applying the CSS properties, “margin and padding” on the puppy page project.

2.8 : Borders

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - Along with the video, practice applying the CSS property, “border” on the puppy page project.

2.9 : Background

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - Along with the video, practice applying the CSS property, “background-image” on the puppy page project.

2.10 : Fonts

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - Along with the video, practice linking Google Fonts on your project and applying the CSS property “fonts”.

2.11 : Color

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - Along with the video, practice applying CSS color properties to your projects.

2.12 : Priority order in CSS

- Watch the video
- Read the corresponding note section
- Hands-on Computer:
 - Test priority or specificity of CSS along with the video

2.13 : Conclusion

- Watch the video

Note:

By the time you've finished learning the theory, you should be able to:

1. Prepare all questions for which you will need additional explanations.
 - Make sure your questions are organized in conjunction with the corresponding videos.
2. Redo all the class demos on your computer
 - Build puppy-lover's-page, along with the video.
 - Apply/ practice all of the most commonly used CSS properties along with the video.

Step 2: Attend the live classes

- This is your opportunity to get answers to any theoretical questions you may have

Note:

- Re-watching and discussing the lectures reinforces what you've learned

Step 3: Complete the knowledge checklist

- Go through the knowledge checklist to ensure you understand all the key points.

Step 4: Work on the exercises

This week's exercise is to complete these three assignments. Detailed steps you should follow on how to complete the assignments can be found at this link:

[Practice Question - CSS \(Puppy page\)](#)

Build puppy-lover's-page

- Steps:

- Start by building ONLY the HTML structure of the Puppy Lover's page. There is a video link below that will walk you through the process of building the website, step-by-step:

<https://www.youtube.com/watch?v=J90pTe0bBMw>

- Start adding names to your HTML (Classes and IDs)
- Start styling your HTML using CSS

Note:

First, try to work on the assignments on your own. Make a list of all the questions and difficulties you encountered while working on the assignments. During group discussion hours, you will discuss these with your teachers.

Step 5: Attend group discussions

Note:

- This is the time to address any difficulties you encountered while working on the assignments.
- This is also another opportunity to discuss any questions you may have about this week's topic.
